# Accuvant Global Education

## Pricing

Accuvant security classes are priced at \$2,995 USD per person per location. Students receive 32 hours of instruction provided by a senior Accuvant consultant, hands-on exercises, training manual, and access to demo gear. Accuvant is committed to keeping classes informative, interactive and limits class size to 16 students.

## Registration

To register for an upcoming course please email [education@accuvant.com](mailto:education@accuvant.com) or contact your local sales representative.

## Course Descriptions

- **Persistent Attack and Exploitation: Network Defense** – This expert class empowers students to architect the required network defenses to counter advanced threats and complex cyber attacks with today's technology options.
- **Persistent Attack and Exploitation: Offense** – This interactive course provides in-depth knowledge transfer and examination of the latest offensive hacking and network/system penetration techniques, empowering students to be proactive in analyzing the susceptibility of their critical data assets to would-be attackers.
- **Persistent Attack and Exploitation: Secure Coding and Threat Modeling** – This highly practical course focuses on the analysis and testing of security controls within Web-based applications through real-world exercises and a variety of testing methods including source code analysis, dynamic testing tools and techniques, and logical design and architectural analysis leveraging industry standard threat modeling procedures. In addition to testing skills, students are taught the principles of defensive programming, remediation management within the major application vulnerability classes, and how to design secure application environments and architectures.

Classes are taught by our Accuvant LABS security professionals who have extensive expertise in developing results for a variety of industries and providing security solutions to both large and small corporations. These instructor-led courses provide up-to-date knowledge and skills you require to understand and deliver meaningful security measures.

## Why Accuvant?

Accuvant is the only research-driven information security partner delivering alignment between IT security and business objectives, clarity to complex security challenges and confidence in complex security decisions. Since 2002, more than 3,900 organizations, including 65 of the Fortune 100 and 20 of the largest U.S. Federal Agencies, have trusted Accuvant with their security challenges. As a premier information security organization, Accuvant is uniquely positioned to educate security professionals on the latest security threats and industry best practices. Our insight gained from delivering thousands of security projects allows us to share meaningful and current information to organizations that are striving to build effective security programs.
